

## BE GUIDED BY SENSEI PPM EXPERTS

### What we've learnt

A PPM solution can bring you many benefits but making sense of all the functions & features and relating them to your own requirements can be challenging.

Our years of experience have shown us that if organisations can't clearly articulate their requirements, it is difficult for vendors to provide them with a solution or a proposal that meets their needs and delivers the business value required.

### What you can access

If you are having difficulty identifying your PMO and project delivery pain points, articulating your requirements and mapping them to a potential solution, speak to us about our complimentary half-day Envision Workshop.

Sensei will help align your needs with best practice, in a way that is practical and suitable for your organisation, show you how to leverage your technology and provide you with a roadmap to achieve your PPM goals.

### What you can achieve

*"Sensei has embedded knowledge within our Project Management Office. Whenever we need additional help, nothing is too much trouble; they are there to augment our own capabilities as required."*

Christie Margin, PMO Team Leader - Swinburne University of Technology

#### PPM MATURITY

Sensei's PPM maturity assessment helps you to evaluate your current maturity levels and suggested changes for your People, Processes and Tools.

#### PAIN POINTS
