

Delivering your PPM Solution

It's important with any technology investment that you are confident in the team who are tasked to deliver and deploy it to run their engagements efficiently and effectively to achieve the agreed outcomes.

From Day One, Sensei will work with you to support your technical readiness in preparation for the deployment of your Sensei solution into your Microsoft 365 tenant.

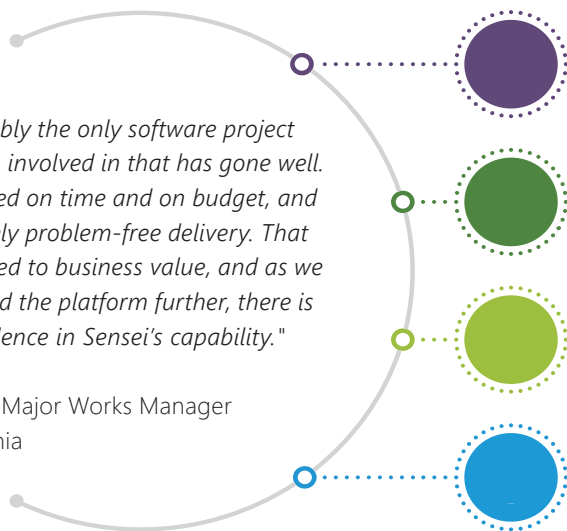

Using open and transparent communication, the Sensei team

will work with you to map out the engagement and validate and prioritise your requirements. Each project will have an assigned project owner to work with you, and the project team will comprise a combination of highly qualified technical resources and experienced PPM/ Microsoft/functional consultants.

The Sensei team will bring your requirements to life efficiently and effectively by sharing lessons learned and applying thought leadership when delivering a best practice PPM solution to meet the needs of your organisation.

"This is probably the only software project I've ever been involved in that has gone well. It was delivered on time and on budget, and with a uniquely problem-free delivery. That has contributed to business value, and as we look to expand the platform further, there is a lot of confidence in Sensei's capability."

Brad Turner - Major Works Manager
Hydro Tasmania

IMMEDIATE BUSINESS VALUE

Sensei leverages the investment you've made in Microsoft technology and demonstrates immediate value to your PMO and Executives by delivering trustworthy data from a single source of truth.

IN-BUILT COMPLIANCE

Our team of experts will optimise and automate your business process flows and approval processes to create consistent and compliant outcomes across your organisation.

SEAMLESS INTEGRATIONS

Our delivery teams will work with you to understand the integrations required between your finance and other line of business systems. This is a common requirement to ensure complete visibility of project performance.

SECURITY

Your PPM solution is securely deployed into your own Microsoft 365 tenant with all data stored in Microsoft Dataverse.

About the Sensei Delivery & Consulting Team

We have one of the largest, most experienced, and well-respected teams delivering the full suite of cloud-based Microsoft Work Management, Project and Portfolio and Power Platform technologies.

Sensei is a Microsoft Solutions Partner with a range of competencies including Project and Portfolio Management, Cloud Productivity, Data Analytics and more. We are committed to the Microsoft platform and continuously look to enhance and extend our certifications and qualifications to remain the thought leaders and technical experts in our industry.

If you've chosen Microsoft technology, we have the expertise to partner with you to leverage the investment you've made and bring you global best practice usage.
